Multi QAQC Engine

3.80 KB • 242 linesFormatting may be inconsistent from source

```
1) TEMEL GERÇEK: SENİN SİSTEMİN = MULTI-AGENT QAQC ENGINE

Hermes zaten bunu native destekliyor:

Orchestrator → işi bölüyor
Specialist agent → işi yapıyor
Parallel execution → hız
Structured output → kontrol

Ama kritik fark:

Senin sistem "chat agent" değil → decision + validation engine

2) ÖNERDİĞİM MİMARİ (NET)
🔴 CORE YAPI
QAQC Orchestrator Agent (MAIN)
│
├── Spec Compliance Agent
├── Submittal Review Agent
├── Method Statement Generator Agent
├── ITP/QCP Builder Agent
├── Site Inspection Agent
├── NCR Risk Agent
├── Reporting & Dashboard Agent
🔵 1. QAQC ORCHESTRATOR (BEYİN)

Görev:

Contractor submission gelir
Hangi agent'a gidecek karar verir
Sonuçları toplar
Final QA judgement verir

Hermes pattern:

Orchestrator → worker agents dağıtır

🟢 2. SPEC COMPLIANCE AGENT

Input:

Specification
Standard (ASTM / BS / EN)
Submittal

Output:

Compliance matrix
Gap list
Risk flag
🟡 3. SUBMITTAL REVIEW AGENT

Yapar:

Material approval
Method statement kontrol
Technical compliance
🟣 4. DOCUMENT GENERATOR AGENT
```
